GUMMALLA SRAVAN KUMAR

MERN Stack Developer | Full-Stack Web Developer

Vijayawada, Andhra Pradesh • +91 77020 96239 • sravankumargummalla@gmail.com • GitHub

PROFESSIONAL SUMMARY

Computer Science graduate and MERN stack developer with hands-on experience building responsive, production-ready web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in developing RESTful APIs, dynamic user interfaces, and cloud-integrated media handling with Cloudinary. Strong foundation in JavaScript, data structures, and algorithms, with a proven ability to deliver clean, scalable, and user-centric solutions. Seeking a MERN Stack Developer role to contribute to impactful, high-quality products.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, REST API Integration
- **Backend:** Node.js, Express.js, RESTful API Development, Authentication & Middleware
- **Database:** MongoDB, Mongoose, MySQL
- **Cloud & Media:** Cloudinary (image upload, storage & delivery), Media Management
- **Languages:** JavaScript, Python, Java, C, C++
- **Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Eclipse, MS Office, Photoshop
- **Core Concepts:** Data Structures, Algorithms, OOP, Artificial Intelligence, Machine Learning

PROJECTS & DEVELOPMENT EXPERIENCE

Dheergayush — Website Development (Frontend & Cloud Integration) *2026*

MERN Stack • React.js, Node.js, Cloudinary

- Developed and deployed the frontend of the Dheergayush website using React.js, building reusable components and a responsive, cross-device user interface.
- Integrated Cloudinary for image publishing, enabling dynamic upload, cloud storage, and optimized delivery of media assets across the platform.
- Implemented ongoing UI updates and enhancements to improve visual consistency, usability, and overall user experience.
- Connected the frontend with backend REST APIs for seamless data flow and efficient rendering of dynamic content.

Smart Traffic Violation Detection using AI & CCTV *2026*

Python, YOLO, OpenCV, Deep Learning

- Built a real-time traffic violation detection system using YOLO and computer vision to automatically identify signal jumping and over-speeding.
- Designed scalable video-processing pipelines in Python with deep learning frameworks for reliable, high-throughput inference.

Next-Gen Deepfake Detection *2026*

Python, TensorFlow, PyTorch, CNN, Transformers

- Engineered an AI system for deepfake detection using CNN and transformer architectures, enabling real-time inference and decision-making.
- Designed modular, scalable pipelines with adaptive feedback loops for continuous model optimization, improving detection reliability for digital content verification.

Higher Education Promotional Strategy using Sentiment Analysis *2025*

Python, NLP, Machine Learning

- Developed an AI-driven system to analyze student feedback using NLP and sentiment analysis for data-driven decision-making.
- Built modular pipelines for data processing, classification, and insight generation to optimize institutional outreach and engagement.

EDUCATION

Usha Rama College of Engineering and Technology *10/2022 – 04/2026*
B.Tech, Computer Science and Engineering — 80% | Telaprolu, AP

Chaitanya Junior College (MPC) *07/2020 – 04/2022*
Intermediate — 80% | Gannavaram, AP

Sree Ganesh High School (SSC) *2019 – 2020*
Secondary School Certificate — 92% | Peddavutapalli, AP

CERTIFICATIONS

- Java Full Stack Development

LEADERSHIP & ACTIVITIES

Vice President — Technozola (Student Organisation) *10/2024 – 03/2025*

- Led and executed technical events, workshops, and innovation initiatives, fostering a culture of technology adoption among peers.
